

**Dear business partner,**

We look back on an exciting year 2013 with two important trade fairs for MITEX - the ICE und the K 2013 which has resulted in a productive outcome for our visitors and ourselves. But let's not stay where we are but climb higher peaks. In 2014 you can again look forward to innovative products and new co-operation partnerships. There is a new product group which will enrich our portfolio – the “Vortex Mixers” which we sell CE certified exclusively in Europe with our new business partner from Canada - StateMix.

Georg Heinen – Managing Director  
MITEX GmbH

**MITEX and StateMix joint together at K 2013**

Rollers and roller coverings by MITEX could be seen and experienced at the K 2013 trade fair in hall 5, stand D41.

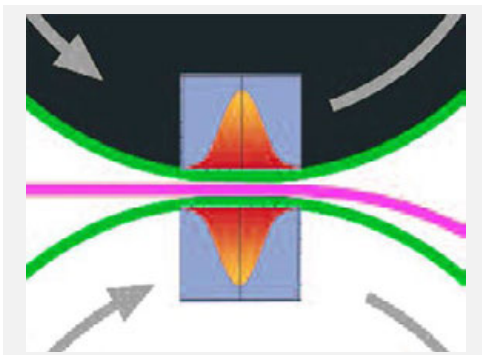

The MITEX **SoftSpreader**, which allows excellent spreading especially for sensitive surfaces without overstretching of foils, attracted our visitors' attention, and furthermore the **Calantec** roller surface, an innovation through an extensive research program (ZIM), for matt finish film surfaces for the PVC film and foil production. Further information can be given by our sales team by our sales team under tel. +49 (0)211 90006-0 or [info@mitex.de](mailto:info@mitex.de).

Together with our new business partner StateMix we demonstrated the lab unit of the vortex mixers product range that can be bought through MITEX (for further reading please see next paragraph).

**New product range at MITEX: VORTEX MIXER VM-200; VM- 1,000; VM-2,500 and VM-10,000**

The smallest unit of the vortex mixers - the **VM-200** - caught the attention of the K 2013 visitors' due to its very fast and effective mixing results for mixing materials such as polyurethanes or epoxies with different viscosities in a jar cup. The mixers are also available for capacities up to 10 kg in a plastic pail with a resealable lid. Please watch the demo video under [www.statemix.com](http://www.statemix.com) or contact our sales team under tel. +49 (0)211 90006-54 or [info@mitex.de](mailto:info@mitex.de).

**New product: MITEX TRIFLEX**

**Triflex** is our new covering for squeezing rollers especially for the steel industry. It allows better squeezing, a longer period of usage, less costs for installation and demounting.

For further questions please feel free to contact our sales team under [info@mitex.de](mailto:info@mitex.de) or tel. +49 (0)211 90006-0.

**HAMICO Brazil reinforces our Polyurethane division**

HAMICO as Joint Venture reinforces the MITEX group with its expert know-how in the area of composites and finding solutions for specific roller coverings fulfilling international standards.
