

Problems due to insufficient spreading effect and wrinkles in the process or product?

Homogeneous tension across film width even with the most sensitive films?

UNIQUE **SPREADING EFFECT** DUE TO EXACT **TRACTION SPIRAL** ON ROLLER SURFACE

- / / Spreading effect without overstretching the film locally
- / / Durable and long lasting function
- / / Enables ideal, homogeneous spreading for foils down to 30 µm
- / / Antistatic, ATEX and FDA versions available
- / / Easy to clean, avoids contamination through accumulation

Increase your product quality and process reliability.
