

Problems due to insufficient spreading effect and wrinkles in the process or product?

Homogeneous tension across film width even with the most sensitive films?

## UNIQUE **SPREADING EFFECT** DUE TO EXACT **TRACTION SPIRAL** ON ROLLER SURFACE

∩ Spreading effect without overstretching the film locally

∩ Durable and long lasting function

∩ Enables ideal, homogeneous spreading for foils down to 30 µm

∩ Antistatic, ATEX and FDA versions available

∩ Easy to clean, avoids contamination through accumulation

Increase your product quality and process reliability.
